

Golden Ratio Token

Whitepaper April 2020

Version 0.week2 , 17 april

Abstract.

GoldenRatioToken (GRT) project is an experiment which has no funding to prove the importance of a quality community in a crypto related project. Our goal is to create value into the project which will flow back into the crypto community benefiting other projects. Therefore our supply will be distributed among active people contributing to the global crypto community.

The experiment is also aimed to be established as a viable project within 90 days. We aim to achieve this by creating several mechanisms and use cases

This whitepaper is a dynamic whitepaper, there will be additions and adjustments along the experiment, we will keep an archive of every prior released whitepaper.

We are not an ICO, nor will do any token sales. All tokens available on exchanges are from the distribution and not offered by the Golden Ratio Token Project.

Usecase goals:

Community

- Supporting the global crypto community through the experiment by creating value on the GoldenRatioToken, which will mean a flow in liquidity for other projects from our project.

Gambling

- Dapps , several gambling related smart-contracts, ran over dapps in a wallet/metamask.
- Integration of GRT to casino platform from blockmatrix.com

Marketing

- Bulk tools for data appending and data processing/cleaning/sorting/formatting

Any other suggested / community collaborations ending up in not described usecases.

Tokenomics / EcoSystem

Low Supply of 16180 tokens total

Supply been dropped to 175+ people related to crypto projects

25% to first 25 people at 1%

25% to 50 people at 0.5% ---> Adjusted , some went out as 1%

25% to 100 people at 0.25% ---> Adjusted , we might make exceptions and still grant parts of 0.5% to certain projects

15% reserved for networking/exchanges/rewards and future donations to projects (max 1% per exchange/reward)

10% to 1618 people at 1 GRT each

Ecosystem:

All revenue or commissions generated by the project will be spent to buy back GRT from the exchanges and be used to build up liquidity in the bid walls on the exchanges.

Voluntary Timelocking option through SovCube

Timeline

Week 1 (Day 1-7) April 7 2020 - April 13 2020

- Setup Token -completed Apr-07-2020
(<https://etherscan.io/tx/0x8e03ee6b3d1067fcab28481843e7770b8914a2bc3eb044ffa28ba17d35b9da4c>)
- Create Social Media, Setup Website and graphics - (<http://goldenratiotoken.site>)
- Write this whitepaper
- Lobby for free exchange listings (could be 1% supply donated to the exchange)
